

HIP HOLD

9+ months

Adjust the loops to your preferred size. Hold the two loops together with the cross-over section in the one hand and the adjustable straps in the other.

Place your head and one arm through the double loop.

Layer one loop over the other to create a double layer and spread open the fabric of the carrier to form a hammock-like seat.

Lower baby into the fabric seat created, with baby's legs straddling your hip. Scoop the fabric under baby's bottom, spread to the knee creases to create a full seat, squeeze the fabric up to baby's shoulders for full back support.

Adjust and spread the fabric over your opposite shoulder for comfort.

TIP: Baby should be high enough to be sitting in your waist.

SAFETY CHECK LIST:

Head Support:

If baby does not yet have head control, spread the fabric to support his/her head.

Airways Open

Baby's face should always be visible to monitor breathing

Right Position:

Baby should be high enough on your chest to kiss the top of baby's head. If too low, lift baby to the desired height with your hand under baby's bottom. Tighten the fabric loops by pulling down on the adjustable straps one at a time.

Comfort:

Adjust and spread the fabric over your shoulders to relieve any strain on your neck and shoulders.

Healthy Hip Position:

Spread the fabric from one knee crease to the other to create a full seat for baby. Baby's Bottom should be lower than their knees as prescribed by the Hip Dysplasia Institute.

IMPORTANT:

- For pre-term, low birthweight babies and children with medical conditions, seek advice from a health professional before using this product.
- Constantly monitor your baby and ensure their airways are visible and unobstructed.
- When wearing the wrap check on baby often to make sure that baby is not too hot
- The SnuggleRoo wrap is designed for use by adults when standing, walking or sitting only
- Be aware that your balance may be adversely affected by movement of your child.
- Keep one hand on baby when moving. Always take extra care when moving, bending, leaning forwards or sideways.
- When wearing baby in the carrier, take extra care to move carefully around objects, through doorways and near sharp edges
- Do not cook or carry hot liquids while carrying baby in the SnuggleRoo Carrier.

GETTING STARTED:
Hold the cross-over section in front of you.

Slip your hands under the adjustable straps and pull onto your shoulders.

Find the centre opening and pull over your head like a shirt. Slide the crossover section backwards between your shoulder blades.

Pull down on the straps to adjust for your preferred size.

Slide the outermost loop of fabric off your shoulder. You should now have one loop around your waist and one on your shoulder.

Stretch open the fabric loop to form a pouch for baby.

Place baby on your chest in the fetal position (knees tucked in up to their tummy). Tuck baby's feet into the pouch. Scoop the fabric under baby to support their weight.

Pull the second loop of fabric back up onto your shoulder. Spread the fabric over baby's back and tuck under their feet to create a second pouch. Ensure baby's head is well supported at all times.
TIP: Fold the fabric on your shoulder over itself to tighten any loose fabric

Lift baby to the desired height with one hand under baby's nappy. Baby should be high enough to kiss the top of baby's head.
Tighten the fabric by pulling down on the adjustable straps.

Turn your storage bag inside out to reveal your support band. Position the support band over baby's back and scoop under baby's nappy. Pull firmly to tie in the small of your back. The support band offers extra support and recreates the comforting tight hug of the womb.

Gently lower baby into first loop with the fabric positioned in between baby's legs.

Spread the fabric from one knee crease to the other to create a full seat under baby's bottom.

Position the second loop of fabric between baby's legs and pull back up onto your shoulder.

Spread both pieces of fabric under baby's bottom from one knee crease to the other to create a full seat for baby. Baby's bottom should be lower than their knees as outlined by the Hip Dysplasia Institute.

Lift baby to the desired height with one hand under baby's nappy. Baby should be high enough to kiss the top of baby's head.
Tighten the fabric by pulling down on the adjustable straps.

Turn your storage bag inside out to reveal your support band. Position the support band over baby's back and scoop under baby's nappy. Pull firmly to tie in the small of your back. The support band offers extra support and recreates the comforting tight hug of the womb.

Hold baby facing outwards. Slide baby's leg and arm through the loop of fabric with the fabric positioned between baby's legs.

Spread the fabric from one knee crease to the other to create a seat under baby's bottom.

Position the second loop of fabric between baby's legs and pull back up onto your shoulder.

Spread both pieces of fabric under baby's bottom from one knee crease to the other to create a full seat for baby.
